

An Exclusive Business Insurance Program Designed for RMTMA

We Protect the Future of Precision Manufacturers

Precision Manufacturing Insurance Services (PMIS) provides precision manufacturers with comprehensive, competitive insurance and risk management solutions. We offer our knowledge, experience, and service to metalworking manufacturers that put people to work, contribute significantly to our national GDP, and deliver quality products worldwide.

We Specialize in Insurance for Precision Manufacturers

Your work is precise and custom. With PMIS, you'll get the same type of focused approach with your insurance and risk management services. Recognized nationwide for our specialization in protecting metalworking companies, we'll provide you with tailored solutions based on your unique risks.

Why Use PMIS?

We are Precision Manufacturing Insurance Specialists. This is who we are and the only thing we do. We are not a generalist broker who happens to write a few metalworking accounts.

We write more than 1,000 policies for metalworking companies due to our longstanding relationships with insurance markets. We deliver affordable solutions to our clients that protect their property, assets, employees, and reputation while reducing risk and costs. Let us show you the insurance solutions and programs we've created for you.
